# Help reduce our waste

Disposable cups  
are **not** recyclable...

Make  
*the*  
change

### Plastic lining

Cups are lined with a thin polyethylene membrane to make them waterproof. It is attached so tight and difficult to remove preventing the cup from being recycled.

### Paper cup and base

Cups are made from high quality paper pulp. Recycled paper is not used due to the risk of contamination.

**FACT**  
There are 667  
disposable cups  
used every  
day across CSU  
campuses

**FACT**  
Coffee cups are  
the most common  
contaminant in  
our recycling  
stream

**FACT**  
Stacking these  
cups on top of one  
another would  
stand more than  
100m high

### Polystyrene lid

Most disposable lids are made from polystyrene, a rigid plastic that is difficult for processors to separate and not commonly recycled.

KEEP

#betteronres

"I love it!" - Emma

"Keeping the keep in the Keep cup" - Enya

"I love my Keep Cup" - Kaitlin

"The keep cup has been so convenient for me, I have used it frequently when heading to class or the library for study. It has saved me money as I can make my coffee or tea before heading to class or save when buying a coffee from the G. The colour of my cup is pretty cute too.

Keep it real." - Renae
